Profile

A **Software Developer** with expertise in **backend development**. **Proficient** in building **scalable** and **efficient software systems** from scratch. I also have **hands-on experience** in implementing various **ML algorithms** with libraries like **sci-kit learn, YOLO**.

Skills

JavaScript | Python | Java | NodeJS |
ExpressJS | MYSQL | React JS | MongoDB |
Machine Learning | YOLO | Git | Linux |
TailwindCSS | Local AI Models

Education

Amrita Vishwa Vidyapeetham
B.Tech in Computer Science & Engineering
2023 – present | Chennai, India
CGPA: 8.99

The Study Lecole Internationale
Higher Secondary Education
2023 | Pondicherry, India
Percentage: 95.6%

Technical Leadership

GeeksForGeeks Campus Body Student Club, Amrita Chennai 
Techinal Co-Head & Web-Dev Lead
05/2025 – Present | Chennai

- **Led** a team of **3 developers** in building the club's **official website**.
- **Delivered** an extensive **90-minute** workshop on **Git & GitHub** to **50+ attendees**.
- Member of the **organizing team** of a **24-hour** hackathon "**TechBiz 2025**".

Awards

Technopoly 2025 WINNER 
Amrita Vishwa Vidyapeetham, Chennai
2025

Projects

ButlerAI- File Organizer

An AI-powered Local File Organizer

- **Developed** a **100% Python** based, **AI-powered** local file organizer to **smartly rename** and **sort** cluttered file **directories**.
- The project uses the **Gemma3:4b vision model** to perform its tasks.
- This **CLI-based** application **prioritizes** user **privacy** by performing operations locally.

Tantrotsav 2025 Tech Fest Website

Official website for Amrita Chennai's national level Tech Fest.

- **Architected** and **deployed** the official Tantrotsav 2025 website using the **MERN stack**, delivering a **seamless and modern user experience** for **thousands** of participants.
- **Facilitated over 3,000 event registrations** for **1,700+ students**, integrating real-time payment processing and efficient administrative dashboards.
- **Managed transactions exceeding Rs. 3.5 lakhs**, ensuring robust performance, security, and scalability of the platform.

Text Highlighter Extension

A Google Chrome Extension to highlight text.

- **Created** a Google Chrome Extension, "**Text Highlighter**," leveraging **JavaScript, HTML, and CSS** to provide users with efficient **webpage annotation** capabilities.
- Implemented **persistent highlight** functionality across multiple page visits, estimated to enhance **user productivity** by **20%** and **information retention** by **15%** by securely storing and retrieving annotations.

Hostel Assist Application

A distributed systems based hostel utility application

- **Developed** a **Java-based application** which serves as a **single platform** for all **hostel related problems** and queries.
- The application is **predominantly** done using **Java** and **Java Swing**, and also includes **Python Flask** and **ReactJS** in some of the modules.
- Demonstrates various distributed systems concepts like **RMI, RPC, Peer-to-Peer** and **Shared Memory** interface.
- The project consists of **5 different modules** each solving a problem and the **user** interacting with an **integrated application** of it.
- Supports **communication** from **multiple users** connected in a **same network**.
